

Aelita Li

WeChat: 15221824019 | 15221824019@163.com | Changning, Shanghai | 7 years in finance and analytics | M.S. in Applied Statistics, Tongji University

Focused on **FP&A, business analysis, forecasting and budget management**, with experience in Power BI analytics, data governance, forecast tracking, anomaly identification and root-cause analysis.

Core Skills & Certifications

Certifications: CPA Non-practicing | ACCA Passed | CFA Level I | Tax Agent | Intermediate Accountant | CET-6 | Intermediate Interpreter

Data Skills: Excel | Power BI | SQL | Python

Finance & Business: KPI analysis, sensitivity analysis, rolling forecast, scenario modeling, budget management, management reporting and consolidated reporting

Statistical Modeling: Time series, machine learning, deep learning and mathematical statistics; applied ARIMA, LGBM, LSTM, TFT and SAC in research and competitions

Work Experience

Wedo Technology | Senior Financial Analyst

Sep 2024 – Aug 2026

- Overseas FP&A & Business Analysis:** Managed budget, rolling forecast and actual-vs-budget analysis; explained business fluctuations by volume, cost structure, unit cost and strategy changes.
- Cost Model & BI Analytics:** Built Power BI cost analytics models from scratch, defining metric logic and allocation rules for automated calculation, multi-dimensional views and anomaly monitoring.
- Forecasting & Scenario Modeling:** Built parameterized long-term cost forecasting logic and scenario models; selected country and total-cost forecasts stayed within **5%** variance.
- Daily Cost Tracking:** Refined daily cost dashboard logic as business requirement owner, validating metrics and outputs for intra-month forecast variance tracking and adjustment.

China Minsheng Investment Group | General Ledger Accountant, Reporting Analysis

Oct 2021 – Jun 2024

- Financial Analysis:** Prepared monthly and annual financial analysis reports, including YoY, MoM and abnormal fluctuation analysis on key financial statement items.
- Management Reporting & Automation:** Built consolidated financial and expense analysis templates, and used Excel and Python to automate part of the reporting process.
- Financial Data Governance:** Reviewed historical ledgers and accounting data, identified long-outstanding balances and book-record discrepancies, and supported clarification and accounting adjustment of approximately **RMB 180 million** historical liabilities.
- Reporting Systemization:** Mapped data sources, field definitions and preparation logic for financial schedules and consolidated reports, and coordinated online reporting migration.

Nanyan Group | General Ledger Accountant / Shanghai Junhua Fuli Information Technology Co., Ltd. | Finance Specialist

Jul 2020 – Oct 2021 / Jan 2019 – Jul 2020

- Managed accounting records, financial and management reports, standardized cash/revenue/reconciliation templates, cleaned historical intercompany and receivable data, and supported finance process automation including WeChat self-service invoicing.

Key Data Projects

Budget Management & Process Re-engineering | Project Lead

Aug 2025 – Sep 2025

- Process Redesign:** Migrated offline budget collection and approval from Excel circulation to Google Sheets collaboration, standardizing rules, departmental ownership and version control.
- Power BI Dashboard:** Built budget and actual-vs-budget dashboards, integrating budget, actual cost and business metrics as key inputs for daily cost forecasting.

Power BI Cost Calculation & Analytics Model | Core Contributor

Sep 2024 – Aug 2025

- Cost Allocation Model:** Built cost allocation and visual analytics models from scratch, defining cost data, business metrics, allocation rules and validation logic.
- BI Rebuild:** Rebuilt the model in Power BI, restructured the database and analysis logic, and added parameterized forecasting and scenario simulation to support cost analysis.

Multimodal Public Opinion Anomaly Warning System for Infinity Nikki | Independent Research Project

Sep 2025 – Mar 2026

- Built a multimodal anomaly monitoring framework for *Infinity Nikki*, processing **1.25M text posts** and **1.04M images**, with a **19-dimensional indicator system** and methods including time-series decomposition, TFT, topic modeling and image clustering.

Education

Tongji University | M.S. in Applied Statistics, Part-time | Sep 2024 – Jun 2026

Major-course average: **94.5**; thesis recommended for Outstanding Thesis candidate.

Coursework and practice focused on statistical modeling, machine learning and reinforcement learning, time series analysis and quantitative analysis.

Shanghai University of International Business and Economics | B.A. in Accounting, International Program | Sep 2015 – Jun 2019

GPA 3.61/4.0; scholarships for 7 consecutive semesters; ACCA exams passed.

Competitions & Awards

2024 National Graduate Big Data Modeling Competition, Third Prize:

SARIMA/LSTM forecasting and result analysis.

2025 National Student Statistical Modeling Competition, Shanghai Third Prize:

SAC hedging environment setup and result evaluation.

2017 Pigai Cup National English Writing Competition, National Final First Prize
